Education

Lehigh University Bethlehem, PA

Bachelor of Science in Computer Science and Business, Minor in Applied Mathematics *Aug. 2025 – May 2029*

- **Cumulative GPA:** 3.73
- **Relevant Coursework:** Data Structures and Programming, Software Engineering, Linear Algebra, Probability and Statistics, Financial Accounting, Macroeconomics

Experience

Lehigh University Bethlehem, PA

Undergraduate Research | Professor Wayne Lee Computational Simulation & Network Science Lab Aug. 2026 – Present

- Built a Python (pandas) ETL pipeline converting oral cholera vaccine outbreak, request, and delivery logs across 25 African countries (2013–2019) into an RL-ready state-action dataset with engineered lag and cumulative-burden features
- Modeled baseline response dynamics via Logistic Regression, GEE, and Mixed-Effects models to establish response-delay benchmarks for a reinforcement-learning allocation agent to outperform
- Resolved data-quality issues (missing IDs, incomplete records, anomalous timestamps), producing a clean dataset for downstream RL training
- Decomposed a ˜35 million-dose gap between approved and delivered vaccines and cross-validated findings against published GTFCC literature

Lehigh University Bethlehem, PA

ML/Data Engineer | STEM Visualization Impact Fellowship *Jan. 2026 – Present*

- Engineering a SINDy-based equation-discovery module using Python and Bokeh for public release on Lehigh's STEM Visualization platform, enabling researchers to derive governing equations directly from raw data
- Implementing data processing techniques using advanced statistical methods to model and predict linear and periodic system behavior
- Co-developing an interactive chemistry module (ideal gas laws, recycling systems) for the school's chemistry course with 3 teammates, projected to reach 200–300 students each semester

Lehigh University Bethlehem, PA

Teaching Assistant | Math Department *Jan. 2026 – Present*

- Evaluate and grade weekly problem sets for MATH205: Linear Methods, a 300-student course, as part of a 6-person grading team, achieving a 0% homework-latency rate for the first time in 2 years
- Mentor students during office hours on conceptually difficult topics — diagonalization/change-of-basis, eigenvalue decomposition, and systems of differential equations

Lehigh University Bethlehem, PA

Student Assistant | Office of International Students and Scholars *Aug. 2025 – Sep. 2026*

- Guided 50+ international students by evaluating their academic, work authorization, and immigration policy inquiries, connecting them with appropriate advisors
- Coordinated facility logistics and setup for 20+ campus-wide international events annually, ensuring seamless execution and community engagement
- Distributed key campus and visa resources to enhance the orientation and integration experience for international students

Technical Skills

Programming Languages: Java, Python, SQL, HTML/CSS/JavaScript
Frameworks & Tools: Git/GitHub, pandas, statsmodels
Methods: Panel Data & Hazard Modeling, Logistic Regression, GEE, Mixed-Effects Models, Observational Study Design
